This gives a finish to your lawn as they cut the grass cleanly without ripping it. Due to high geared side wheels its easy to push. It also gives complete freedom to use the lawnmower anywhere freely. With the rear roller you can gain stripes over your lawn and importantly it offers stability up to lawn edges. Its lightweight at only 7 kg meaning it is easy to move around the garden.

With a 25 L grassbox it means less time is spent emptying and more time can be spend gardening. People use and enjoy their gardens in different ways. Some people just want to recuperate from their busy daytoday lives and appreciate every minute they get to relax. Others take care in looking after their plants and outdoor space. Whether it's alfresco dining, kicking a ball around with the children, or taking pride in a wellmaintained garden, Bosch garden tools ensure effortless gardening that will help you enjoy your outdoor living area. Youll find them easier than ever to handle, use and manoeuvre, making your home and garden jobs easier and even more enjoyable. And if you love keeping decorative lawns trim, a cylinder mower is just the job. The AHM 38 G hand mower is

suitable for precise, small lawns. It also meets the high standards that you have come to expect from Bosch. The result is an accurate, healthy lawn with a cutting height of 15 to 43 mm. Simple, smooth and quiet, suitable for maintaining a small garden. This product comes with a free 2 year guarantee. In order to extend the warranty from 2 to 3 years, please register your new tool with MyBosch. You can register your tool by visiting manufacturers site MyBoschTools site within 28 days of purchase. The horizontally mounted cylinder of blades cut against a fixed bottom blade for a scissorlike cut. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average.

The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Tim Photography 5.0 out of 5 stars Well as you can see, it does! Impressed. And it cuts really well, the grass in photo was wet too, no problems for the Bosch. Recommended. Its a lovely little machine that does the job. Was a little concerned about the putting together but neednt have been its all very straightforward, quick and easy. Everything you need is in a little packet with instructions in the box along with the large sections of the mower itself. The mower worked beautifully from the off. There is a technique to easy cutting with this which just seems to click in as you go hopefully that will make sense. It cuts low too you can change the cutting level if need be and very neatly. If used without the grass collector basket which is, admittedly, a little cumbersome any grass left in the lawn is shredded into tiny pieces and not untidy but easy to collect up if a perfectionist. In my opinion a really good purchase, certainly no regrets and a very good price from Amazon. Very pleased indeed. Well packaged with excellent Amazon delivery. Leaving them in situ allows the soil to stay more moist in the summer months, preventing evaporation but in the other months helps to prevent weed growth. During spring it is a good idea to rake off the dead thatch grass cuttings allowing the new growth and soil to breath. I wanted to convince my wife that Id made a good purchase, but very rapidly I lost all hope. Easy enough to assemble and adjust but thats where it all finished. Only cutting a small front lawn 20 sq.metres but the cutting is so uneven it takes about half an hour. At some points the blades stick too low you might say and at others they leave grass uncut too high you might say.

[grupomarsamo.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c6cb3e2e5a---compaq-3870-manual.pdf](http://grupomarsamo.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c6cb3e2e5a---compaq-3870-manual.pdf)

Each run has to be carried out several times and in different directions so no chance of nice stripes. As others have reported, the cut grass goes anywhere but in the basket. Its clear that no adequate quality assurance was every carried out on this machine. Finally the packaging was so complex that it would be impossible to return it. I intend to stop using Amazon for a month, in order to get back my money. As for Bosch, you guessed! Nothing seems logical and you can forget the diagrams. Once together and basket haha mounted the machine needs constant toing and froing to even cut grass that is 2 to 3 inches long. Once you have done that without it constantly skidding on its cylinder and rear roller, you remove the basket because it is worse than useless, hardly collected a single blade!! Proceed mowing without basket and you would still rather slash your wrists or hang yourself from the nearest tree silver birch in my case. Seriously though, as many other comments have already said, this piece of kit doesnt warrant the name of Qualcast let alone Bosch. Any easy to please German will throw this in the Rhine PDQ. In my case, the Arun!! Yes it is light and manoeuvrable but so are a pair of hand shears they would work better. Cannot believe any positive comments posted are genuine. Had hoped to get rid of either my corded Atco or petrol Hayter, however, one

will have to go off for an expensive overhaul. Something I had honestly hoped to avoid. DO NOT, I repeat, DO NOT give this item even a seconds consideration. Compared to the electric Flymo compact 300 noisy nightmare, its amazing. Quiet asides from a gentle whirl of the blades, and just gets on with mowing. No faff trying to unravel cables and extensions and trying to not behead flowers with the extension, or backtrack round the washing line. No dog barking every time the mower starts up. And no trouble stopping when you find a stone ahead just stop pushing, move it, and carry on.

My dog has a habit of picking rocks out the stone bucket, carrying them round the garden and leaving them in the long grass. The photos show halfway through mowing to show how it copes with the long grass. The basket is mildly annoying so while Im hacking the grass down I left it to one side. Later, Ill remow the same bit with the basket on to collect the trimmings. Its a lovely, well built mower and will be for years to come. Website by emago media. For more information, please read our Privacy Policy. Yes, I agree No Privacy policy Revoke Consent. Please read the manual and pay attention to these symbols. Work area safety Keep work area clean and well lit. Cluttered or dark areas invite accidents. DO NOT operate the laser tool around children or allow children to operate the laser tool. Serious eye injury could result. Read all instructions. The term "tool" in the warnings listed below refers to your mainsoperated corded tool or batteryoperated cordless tool. SAVE ALL WARNINGS AND INSTRUCTIONS FOR FUTURE REFERENCE This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death. Read manual symbol Alerts user to read manual. WARNING indicates a hazardous situation which, if not avoided, could result in death or serious injury. Electrical safety Batteries can explode or leak, cause injury or fire. To reduce this risk, always follow all instructions and warnings on the battery label and package. Do not short any battery terminals. Do not charge alkaline batteries. Do not mix old and new batteries. Replace all of them at the same time with new batteries of the same brand and type. Do not mix battery chemistries. Dispose of or recycle batteries per local code.

Do not dispose of batteries in fire. Keep batteries out of reach of children. Remove batteries if the device will not be used for several months. Personal safety Stay alert, watch what you are doing and use common sense when operating a measuring, detection and layout tool. Do not use a measuring, detection and layout tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating measuring, detection and layout tools may result in serious personal injury or incorrect measurement results. Use safety equipment. Always wear eye protection. Safety equipment such as dust mask, nonskid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries. DO NOT use any optical tools such as, but not limited to, telescopes or transits to view the laser beam. DO NOT stare directly at the laser beam or project the laser beam directly into the eyes of others. Serious eye injury could result. The correct measuring, detection and layout tool will do the job better and safer at the rate for which it was designed. Do not use the measuring, detection and layout tool if the switch does not turn it on and off. Any measuring, detection and layout tool that cannot be controlled with the switch is dangerous and must be repaired. Store idle measuring, detection and layout tools out of the reach of children and do not allow persons unfamiliar with the measuring, detection and layout tool or these instructions to operate the measuring, detection and layout tool. Measuring, detection and layout tools may be dangerous in the hands of untrained users. Maintain measuring, detection and layout tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the measuring, detection and layout tools operation. If damaged, have the measuring, detection and layout tool repaired before use.

Many accidents are caused by poorly maintained measuring, detection and layout tools. Use the measuring, detection and layout tool, accessories, etc., in accordance with these instructions and in the manner intended for the particular type of measuring, detection and layout tool, taking into account the working conditions and the work to be performed. Use of the measuring, detection and layout tool for operations different from those intended could result in a hazardous situation. Service Have your measuring, detection and layout tool serviced by a qualified repair person using only approved replacement parts. This will ensure that the safety of the measuring, detection and layout tool is maintained. Develop a periodic maintenance schedule for your measuring, detection and layout tool. Certain cleaning agents such as gasoline, carbon tetrachloride, ammonia, etc. Safety Rules for Laser Tools The following label is on your laser tool for your safety. ALWAYS BE AWARE of its location when using the tool. DO NOT direct the laser beam at persons or animals and do not stare into the laser beam yourself. This tool produces class 2 laser radiation and complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007. This can lead to persons being blinded. DO NOT place the measuring tool in a position that may cause any one to stare into the laser beam intentionally or unintentionally. Never aim the beam at a workpiece with a reflective surface. Bright shiny reflective sheet steel or similar reflective surfaces are not recommended for laser use. Reflective surfaces could direct the beam back towards the operator. DO NOT operate the measuring tool around children or allow children to operate the measuring tool. ALWAYS Make sure that any bystanders in the vicinity of use are made aware of the dangers of looking directly into the measuring tool.

Do not use the measuring tool to photograph any people or animals, as this involves the laser beam being continuously switched on. DO NOT remove or deface any warning or caution labels. Removing labels increases the risk of exposure to laser radiation. Do not use the measuring tool if the display glass is visibly damaged e.g. cracks in the surface, etc.. This poses a risk of injury. DO NOT operate the measuring tool in combustible areas such as in the presence of flammable liquids, gases or dust. Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure. Do not use the laser viewing glasses as sunglasses or in traffic. The laser viewing glasses do not afford complete UV protection and reduce color perception. DO NOT leave measuring tool "ON" unattended in any operation mode. ALWAYS turn the measuring tool "OFF" when not in use. Leaving the measuring tool "ON" increases the risk of someone inadvertently staring into the laser beam. ALWAYS position the measuring tool securely. Take care to recognize the accuracy and range of the device. Measurement may not be accurate if used beyond the rated range of the device. ALWAYS use only the accessories that are recommended by the manufacturer of your measuring tool. Use of accessories that have been designed for use with other measuring tools could result in serious injury. DO NOT use this measuring tool for any purpose other than those outlined in this manual. This could result in serious injury. ALWAYS remove the batteries when cleaning the laser light aperture and laser lens. DO NOT disassemble the measuring tool. There are no user serviceable parts inside. Do not modify the product in any way. Modifying the measuring tool may result in hazardous laser radiation exposure. Repair and servicing must always be performed by a qualified repair facility.

Repairs performed by unqualified personnel could result in serious injury. Avoid operation in the direct vicinity of the human body over longer periods of time. FCC Caution The manufacturer is not responsible for radio interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions 1 This device may not cause harmful interference, and 2 This device must accept any interference received, including interference that may cause undesired operation. NOTE! This equipment has been tested and f

ound to comply with the limits for a Class B digital devices, pursuant to Part 15 of the FCC rules. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. It is designed and manufactured not to exceed the emission limit for exposure to radio frequency RF energy set by the Ministry of Health Canada, Safety Code 6. These limits are part of comprehensive guidelines and established permitted levels of RF energy for the general population. These guidelines are based on the safety standards previously set by international standard bodies. These standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. This device and its antenna must not be colocated or operating in conjunction with any other antenna or transmitter. This device has been shown to be capable of compliance for localized specific absorption rate SAR for uncontrolled. G Automatic switchoff of the measuring tool is adjustable after 2, 5, 10 minutes or never.

H The lefthand side of the measuring tool serves as the reference level for grade measurement. To open the battery lid, press the latch in the direction of the arrow and remove the battery lid. Insert the batteries. When inserting, pay attention to the correct polarity according to the representation on the inside of the battery compartment. When the battery symbol appears for the first time on the display, measurements are still possible for approx. 15 minutes. When the battery symbol flashes, the batteries must be replaced; measurements are no longer possible. Always replace all batteries at the same time. Only use batteries from one brand and with the identical capacity. Remove the batteries from the tool when not using it for extended periods. When storing for extended periods, the batteries can corrode and discharge themselves. Operation Protect the tool against moisture and direct sun irradiation. Do not subject the tool to extreme temperatures or variations in temperature. As an example, do not leave it in vehicles for longer periods. In case of large variations in temperature, allow the tool to adjust to the ambient temperature before putting it into operation. In case of extreme temperatures or variations in temperature, the accuracy of the tool can be impaired. Avoid heavy impact or falling of the tool. After heavy exterior impact on the tool, an accuracy check should always be carried out before continuing to work see "Accuracy Check of the Distance Measurement", page 36. Other persons could be blinded by the laser beam. The measured values and device settings in the memory are retained when you switch the tool off. Measuring Procedure Once switched on, the measuring tool is in the continuous laser measurement function. After switching on, the rear edge of the measuring tool is preset as the reference level for the measurement. To change the reference level, see "Selecting the Reference Level", page 22.
